Presentation

At the age of 34, on July 27, 2022, I decided to start studying again and change my field of work, with the intention of becoming a programmer. I already have a college degree, in an area not related to programming, but the desire to program spoke louder.

Ever since I was a little boy, I really liked digging through everything inside a computer, such as programs, folders and options. I've always been very interested and comfortable dealing with Word, Excel, doing research on search engines, and this gave me the basis to pursue a career as a programmer and it certainly brings me facilities that other people don't have when they want to enter the area.

In July 2022 I started taking Havard's CS50 course, and after completing several tasks programming in C, I decided to explore more the front-end area by taking The Odin Project and Free Code Camp online courses. With that I got skills in HTML, CSS, JavaScript, Git, Github, Linux, among others.

Currently, after several months of learning to program, I have already concluded the basic and intermediate courses of HTML, CSS and Javascript (foundations of the Odin Project) and I chose the path of being Full Stack Javascript, remaining to complete the advanced knowledge stage. My next steps will be: complete the study in React.js, start learning back-end with Node JS, complete Havard CS50 and start the CS50-Web course (which are more focused on back-end).

Furthermore, in addition to the above, I have experience and skills in customer service, people management, conflict management, among others, acquired over the years during my professional journey, since I have completed higher education in Law. I also have extensive knowledge in computing, being used to working at the computer.

Summary of Qualifications

- Basic knowledge in C language;
- Advanced knowledge of HTML;
- Advanced knowledge of CSS;
- Intermediate knowledge in Javascript;

- Basic knowledge in React JS;
- Knowledge in Git, Github and Linux;
- Advanced knowledge in English. Reference level: proficient user C1 of Common European Framework of Reference for Languages (CEFR);

Vitoria, Espírito Santo, Brazil.

January 13, 2023.
