English

Proficient User C1, CEFR scale.

Professional Experience

Although I have worked in various places and different fields, I am currently seeking a career change and my first experience as a Web Developer. I have experience working with APIs, as well as frameworks and libraries such as React.js, Next.js, Bulma, Tailwind CSS, among others.

Courses

I am a self-taught Web Developer about to become Full Stack. I began my computer science studies with the CS50 course from Harvard University, and then completed some courses on Udemy with Professor Stephen Grider, including "The Modern JavaScript Course" and "Modern React Course." However, I attribute much of my learning to the online bootcamp, The Odin Project.

Objective and Final Thoughts

My goal is to secure a Web Developer position at a reputable IT company, utilizing my skills and knowledge to provide high-quality services, while enhancing my professional experience, expanding my network, and excelling in my work. I am committed to contributing creative and efficient solutions to challenging web projects, helping the company achieve its objectives and goals. I am eager to face new challenges and grow with the company.

This concise resume serves to highlight my professional experience in various fields of web development. I am prepared to discuss in further detail how I can bring value to the team and contribute to the company's growth and innovation.
